METHOD FOR CARRYING OUT AN AUTOMATIC BRAKING ACTION

(EP1427617)

VERFAHREN ZUR DURCHFÜHRUNG EINES AUTOMATISCHEN BREMSVORGANGS

(US20050046272)

The present invention relates to a method for carrying out an automatic braking action, wherein at least one quantity representative of the application of the brake pedal is determined and an automatic braking action is triggered when at least one limit value (brake pedal application limit value) of the quantity representative of the application of the brake pedal is exceeded, wherein the brake pedal application limit value is modified or the quantity representative of the brake pedal is weighted according to at least one action of the driver, in particular a detected movement of the driver's foot, prior to an application of the brake pedal of the braking action considered or prior to the considered braking action.
